Recommendation
Staff recommends that the City Council authorize the city manager to execute three-year master agreements with multiple consulting firms for on-call architectural, landscape architectural, civil engineering, construction inspection, municipal engineering, and materials testing services with options to extend the agreements on a yearly basis for up to two additional years.

Policy Issues
The proposed action is consistent with the City’s purchasing policies. Use of multiyear master agreements assists the timely delivery of capital improvement projects and programs/services to maintain the City’s infrastructure. It also serves as a risk management tool to quickly address emergencies, shifting priorities and staff vacancies. The authorization of these master agreements does not award projects to any of the selected firms; it establishes a pool of resources from which to draw as project needs are identified in the future.

Background
The public works department is responsible for planning, building and maintaining the City’s infrastructure. The department is comprised of engineering, maintenance, and transportation divisions managing projects per the City’s capital improvement program and development service needs. Such projects may include master planning, development permit review, utility upgrades, building and park maintenance, and street and sidewalk repairs. Currently, public works projects are overseen staff engineers and inspectors, and supplemented with contract consulting services. The role of City surveyor is also currently provided through a master agreement.

Over the years, the City Council has authorized the city manager to execute master agreements with consulting firms to augment staffing resources experiencing higher demand. Master agreements have been established by the City for short-term specialized services such as engineering, surveying, transportation, inspection and materials testing. The City’s current master agreements for engineering and surveying services were last authorized by the City Council in 2012, and expire at the end of fiscal year 2019-20. The last set of transportation master agreements was authorized by the City Council November 13, 2018, and may be extended through fiscal year 2024-25, so is not included in this authorization. On August 20, 2019, the City Council authorized the city manager to execute three-year master agreements for on-call architectural design, cost estimating and mechanical, electrical and plumbing (MEP) design services. While
cost estimating and MEP on-calls are not included in this authorization, staff recognized the need to expand the City’s architectural on-call support after further evaluation of current and projected workloads.

Analysis

Master agreements are an efficient tool for providing technical staff support and shorten the time needed to identify qualified firms while adhering to City purchasing policies. This enables the City to more quickly respond to needs by utilizing these consulting firms’ services on an as-needed basis for a specific activity. These services are temporary, and obtained only for the length of time needed to complete the tasks.

Master agreements that involve on-call professional services only provide a list of qualified and vetted consulting firms. Once a master agreement is in place with the listed firms, staff interacts with these firms on an as-needed basis to find the most appropriate level of expertise and knowledge to carry out a specific task. Once a specific firm from the list is identified for the temporary work, the City solicits cost information about the task(s) requested and establishes a purchase order for a not-to-exceed amount from a funding source as included in the annual budget.

The master agreement includes the same language as the City’s standard services contract and requires the consultant to provide proof of insurance and to hold the City harmless for the work performed. The agreements will be for three years with an option to extend yearly for up to two additional years.

On April 13, the City issued a request for qualifications (RFQ) for on-call architectural, landscape architectural, civil engineering, construction inspection, municipal engineering, and materials testing services to develop a list of firms to replace those with expiring master agreements. On May 14, the City received 74 submittals in response to the RFQ as summarized below:

1. Rates range from administrative to principal staff

A selection committee of staff members divided into groups of three to rank proposals by type of on-call service. Upon review, staff identified firms that would best provide the range of specialties for each on-call service. Finalists were chosen based on a number of selection criteria including fee schedule, work methodology, overall proposal quality, availability to work, familiarity with the City of Menlo Park, and previous staff experience, amongst others. Each panelist provided their top choices per this criteria. A follow up meeting was established for group consensus before finalizing the on-call list in the event of discrepancies. Staff recommends entering into agreements with the 21 firms identified on the next page. The remaining firms did not advance based on this ranking system.
Entering master agreements with these firms will help advance funded capital improvement projects. In addition, master agreements will help relieve added workload from staff vacancies and assist project delivery in a timely manner. While these on-call services are meant to be comprehensive for work that is projected through the life of the agreement, it does not preclude the City from issuing project specific requests for future proposals, if desired.

Impact on City Resources

The authorization of these master agreements would not result in a direct expenditure of City resources. Tasks would be assigned through the master agreements to meet the needs and demands identified for each future fiscal year through the adoption of the annual budget and capital improvement program.
The contract amount for services would be identified for each project, depending on the scope of work/services, the number and type of professionals/technicians used, and the level of community engagement needed. The hourly rates for services typically range from $60 to $500 per hour, depending on the area of expertise and experience required to deliver the best products. The costs of these services are budgeted in the program or capital project for which the services are needed. No additional appropriations are being requested at this time.

ADDITIONAL COVERAGES BY WRITTEN CONTRACT, AGREEMENT OR PERMIT

This is a summary of the coverage provided under the following form (complete form available):

BUSINESS LIABILITY COVERAGE FORM SS 00 08 04 05

Additional Insured When Required by Written Contract, Written Agreement or Permit

WHO IS AN INSURED under Section C. is amended to include as an additional insured, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by your acts or omissions or the acts or omissions of those acting on your behalf:

(a) In the performance of your ongoing operations;
(b) In connection with your premises owned by or rented to you; or
(c) In connection with "your work" and included within the "products completed operations hazard", but only if
(i) The written contract or written agreement requires you to provide such coverage to such additional insured; and
(ii) This Coverage Part provides coverage for "bodily injury" or "property damage" included within the "products completed operations hazard".

The person(s) or organization(s) are additional insureds when you have agreed, in a written contract, written agreement or because of a permit issued by a state or political subdivision, that such person or organization be added as an additional insured on your policy, provided the injury or damage occurs subsequent to the execution of the contract or agreement, or the issuance of the permit.

A person or organization is an additional insured under the provision only for that period of time required by the contract, agreement or permit.

With respect to the insurance afforded to the additional insured, this insurance does not apply to: "Bodily injury", "property damage" or "personal and advertising injury" arising out of the rendering of, or failure to render, any professional architectural, engineering or surveying services, including:

(a) The preparing, approving, or failure to prepare or approve, maps, shop drawings, opinions, reports, surveys, field orders, change orders, designs or drawings and specification: or
(b) Supervisory, inspection, architectural or engineering activities.

The limits of insurance that apply to additional insureds are described in Section D. Limits Of Insurance.

How this insurance applies when other insurance is available to an additional insured is described in the Other Insurance Condition in Section E. Liability And Medical Expenses General Conditions.

No person or organization is an insured with respect to the conduct of any current or past partnership, joint venture or limited liability company that is not shown as a Named Insured in the Declarations.

Other Insurance

If other valid and collectible insurance is available for a loss we cover under this Coverage Part, our obligations are limited as follows:

When You Add Others As An Additional Insured To This Insurance: That is other insurance available to an additional insured. However, the following provisions apply to other insurance available to any person or organization who is an additional insured under this Coverage Part:

(a) Primary Insurance When Required By Contract: This insurance is primary if you have agreed in a written contract, written agreement or permit that this insurance be primary. If other insurance is also primary, we will share with all that other insurance by the method described in c. below.
(b) Primary And Non-Contributory To Other Insurance When Required By Contract: If you have agreed in a written contract, written agreement or permit that this insurance is primary and non-contributory with the additional insured’s own insurance, this insurance is primary and we will not seek contribution from that other insurance.
Paragraphs (a) and (b) do not apply to other insurance to which the additional insured has been added as an additional insured.

c. Method Of Sharing
If all the other insurance permits contribution by equal shares, we will follow this method also. Under this approach, each insurer contributes equal amounts until it has paid its applicable limit of insurance or none of the loss remains, whichever comes first.

If any of the other insurance does not permit contribution by equal shares, we will contribute by limits. Under this method, each insurer’s share is based on the ratio of its applicable limit of insurance to the total applicable limits of insurance of all insurers.

Waiver of Subrogation
If you have waived any rights of recovery against any person or organization for all or part of any payment, including Supplementary Payments, we have made under this Coverage Part, we also waive that right, provided you waived your rights of recovery against such person or organization in a contract, agreement or permit that was executed prior to the injury or damage
