EXHIBIT A -1 DETAILED SCOPE OF WORK

Under this agreement, Green Halo Systems would:

Task No.1: As directed by the Community Development Department and this agreement, verify building permit application compliance with the construction and demolition recycling/salvage requirements of the California Building Code and the City's Municipal Code (Chapter 12.48).

Task No.2: Continue to provide the Green Halo Systems online platform to administer the compliance of construction and demolition requirements, and in addition, integrate online platform with the City's Accela permit management system to administer verification and compliance of the California Building Code and the City's municipal code (Chapter 12.48).

Task No.1 Scope: Green Halo Systems would be responsible for two (2) areas of verification and compliance to determine if recycling/salvage requirements have been met through the building permit process:

A1. Before a building permit is issued, Green Halo Systems must check the waste management plans of building permit applications. This includes:

- a. Verifying that the square footage of project and project type is consistent with building permit information. This requires going to the city's website and conducting a building permit search to verify information at:
<https://aca.accela.com/MENLOPARK/Cap/CapHome.aspx?module=Building&TabName=Building>.
- b. Verifying the building permit applicant's estimated waste generated is consistent with Green Halo's estimated calculation.
- c. Verifying that the permit applicant has selected approved recycling/salvage facilities.
- d. If a-c is not in compliance, reject waste management plan and contact applicant to update their waste plans accordingly in order to receive a building permit.
- e. When Accela and Green Halo Systems information is integrated, the A1 requirement can be removed, and Green Halo Systems will program the online platform to lock Accela building permit information in Green Halo so that information cannot be changed by the building permit applicant.

A2. Before final inspection is authorized, Green Halo Systems must check that the building project application has met or exceeded 65% (or most recently adopted) recycling/salvage requirement. This includes:

- a. Verifying that the actual waste generated is reasonably consistent with the estimated or predicted waste reported for the project. If not, notify the applicant to correct. If a correction cannot be made, the recycling rate will be calculated by using the "estimated" waste generated (not actual waste). *No correction is needed if the actual waste exceeds the estimated tonnage. This is only for actual waste that is below the estimated/predicted waste for the project.*
 - i. For example, if the estimated/predicted total waste for the project was 30 tons, and the building permit applicant actual total waste tonnage (both recycling, disposed, or other) is reported as 15 tons, the recycling rate will be determined using the estimated/predicted waste for the project (30 tons) to calculate diversion. If three (3) tons of the 15 actual tons was salvaged or recycled the recycling rate would be calculated as follows:
 - 3 tons of **actual recycled** waste/ 30 tons of **total estimated/predicted** waste generated = 10% **diversion**.
- b. Verifying the diversion rate (65% or more) is met (unless actual generated waste significantly differs from the expected estimated waste generated in "a" above).
- c. Verifying the submitted facilities' tickets to determine if:

- i. Dates reasonably match with the project timeline
- ii. Address or origin of waste shows Menlo Park
- iii. Inputted facilities match Green Halo data
- iv. Inputted material disposed match Green Halo data
- v. Inputted tonnage match Green Halo data
- d. Based on a-c verification, determine if project will:
 - i. Receive full, partial or no deposit refund (if applicable). See next section (A3) for calculation of partial refunds. Make a note on the project (or Accela if applicable) that informs city staff of the project status.

OR

- ii. Receive an inspection or pay a penalty before final inspection. Make a note on the project (or Accela if applicable) that informs city staff that the project may move forward to final inspection or requires \$XXX payment before final inspection. The penalty is calculated at \$1 per square foot of the project regardless of how much was recycled. The minimum penalty amount is \$1,000 if square footage is under 1,000.

A3. Partial Refund Calculations:

- a. If actual and estimated waste generated do not match, partial deposits are calculated as follows:
 - i. Total estimated/predicted waste generation x 65%= Z,
 - ii. Actual recycled tons/Z=Y
 - iii. Y x deposit amount= \$ amount of refund
- b. If actual and estimated generated waste do reasonably match up, but diversion rate is not met, the partial refund is calculated as follows:
 - i. Actual diversion rate x deposit amount= amount of refund
- c. Note that applicant is required to upload deposit refund forms.

A4. Customer Service: As the verification and compliance administrators, Green Halo Systems will be the main point of contact for assisting building permit applicants with questions regarding satisfying the diversion/salvage requirements outlined in this agreement, the state building code, and Menlo Park Municipal Code. Green Halo Systems staff will need to review, understand, and articulate to building permit applicants information found on the city's website and municipal code regarding construction and demolition recycling and salvage requirements. Quality and responsive customer service includes responding to building permit applicants inquires and issues within one business day (Monday through Friday) or notifying the building permit applicant that a response will be provided within the next two business days. Green Halo Systems can contact the Community Development Department or designated city staff to clarify any questions regarding the requirements to assist in providing quality and timely customer service.

A5. Facility Material Verification: From time to time, Green Halo Systems may need to directly contact facilities to determine if the material listed on a ticket is the appropriate designation inputted into Green Halo's online platform. A reasonable analysis and investigation of material not listed or matching between the ticket and the Green Halo System online platform is required, and it is recognized that this could improve the online platform better if material names were changed or added into Green Halo Systems. Green Halo Systems may also add Recycling Certified Institute (RCI) facilities to the list of approved facilities in order to keep pace with market and facility changes. Green Halo Systems may

also remove RCI facilities that no longer have certification. Menlo Park only accepts tickets from RCI facilities.

- A6. Facility Diversion Rate Verification: Every quarter starting in January, Green Halo Systems will contact RCI approved facilities to verify diversion rates of material. A report of the current diversion rates and any changes to the diversion rates of the facilities will be provided to the city along with invoices.
- A7. Performance Review: The city shall have the ability and right to review Green Halo Systems' performance of verification and compliance of the construction and demolition recycling/salvage requirements for building permit applications outlined in A1 to A6 above. The City will notify Green Halo Systems of any reviews or surveys being conducted.
- A8. Payment: Payment for Task No.1 shall be made on a per project basis at completion of the project (after both A1 and A2 above are completed) at a rate of \$150 per project. Green Halo Systems will provide monthly invoices to the City that include building permit number, Green Halo project number, and project address. The City may wish to coordinate payments between the building permit applicant and Green Halo Systems directly in the future.

Task No.2 Scope: Green Halo Systems will provide the city and building permit applicants an online waste tracking platform that allows submission of waste management plans and ability to verify recycling/salvage requirements. The cost for this service is \$199 per month, and includes staff training if necessary. In addition, and at the direction of the Community Development Department, Green Halo Systems will coordinate an effort to integrate the online platform with the City's Accela permit management system. This cost for integration is a one-time fee of \$1,500.

- B3.4** The arbitrator or arbitrators appointed must be former or retired judges, or attorneys at law with last ten (10) years' experience in construction litigation.
