## EXHIBIT A

### SCOPE OF SERVICES

Planned approach and detailed tasks: Our approach would be to deliver a scanning device to the location of the central location of network infrastructure. We will conduct internal and external scans with no limit on IPs. From there we would perform a network discovery scan and mapping. Once the mapping is complete, we would run a vulnerability scan on all reachable subnets. Additional scans would then be run on subnets or networks inaccessible to the location from which the first scan was run. In addition, an external scan will be conducted on the Internet facing IP addresses. Once all subnets are scanned we would retrieve the device. All devices reachable on the network including IoT, OT, network devices, wireless access points, servers, workstations and connected devices would be in scope for the vulnerability scan. Our procedures would be to review the scan results and prepare an executive summary for the results.

Deliverables would include:

- **Executive Summary:** Will summarize the results of all individual scans, observations on the types of vulnerabilities, and overall recommendations for overall improvement.
- **Detailed Technical Reports:** Will include detailed description of the vulnerabilities (flaws or mis-configurations) found by IP address, it will include severity ratings for each, and remediation recommendations. For vulnerabilities with a known exploit we will provide information on the known exploit.
- **Presentation:** Option online or phone conference presentation of executive report.

### Estimated Costs:

Our estimated costs are for this project is \$1,500. This estimate includes normal out-of-pocket costs and some onsite fieldwork review but excludes unusual items such as air travel, which will be billed at actual cost if incurred. If significant additional time is necessary, we will discuss it with you prior to proceeding. The rate for additional hourly services would be billed at a rate of \$250 an hour.

### Schedule:

We will schedule our work to begin on a mutually convenient date, and we expect to complete it and provide our draft report within one week of completion of fieldwork.

### Disclaimer:

Because the agreed-upon procedures above do not constitute an audit, we will not express an opinion on the City's network systems or any elements or items thereof. In addition, we have no obligation to perform any procedures beyond those listed above. We will submit our report listing the procedures performed and our findings. This report will be intended solely for the information and use of the City and will not be intended for and should not be used by anyone other than the City's representatives. The reports and work papers may contain cyber security sensitive information the disclosure of which could leave the City at great risk for cyber attacks.
