Subject: TRAFFIC

I live in the flood triangle. Recently the traffic down Ringwood and Bay road to the 101 access is having an impact on our neighborhood.

I am assuming commuters have discovered Ringwood as an alternative to Willow Road. Traffic stacks up at the stop sign on Ringwood at Bay. Cars head down Bay to Willow and cars stack up all the way down Bay. I can not get to my street without waiting in the line. Also lots of cars are cutting down Oakland, Menlo Oaks, Almanor, Berkeley to access Van Buren Road to cut in further down Bay Road. So many cars are driving down my quite residential street now at commute times.

This is only going to get worse. What is going to be done about it? With APP's directing drivers to alternative routes makes all usually quite neighborhood streets vulnerable to outside commuter traffic.

Before any further development happens traffic needs to be studied. This is not to be ignored.
